

the Machine Descaler™

BCC101 & BCC102

Breville®

the Machine Descaler™

BCC101 = 6 x 25 g
BCC102 = 12 x 25 g

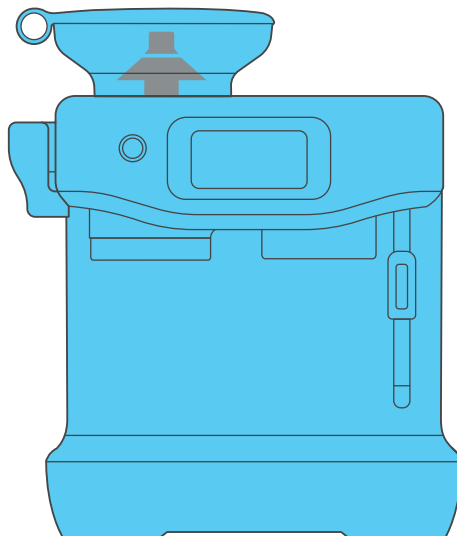

NOTE

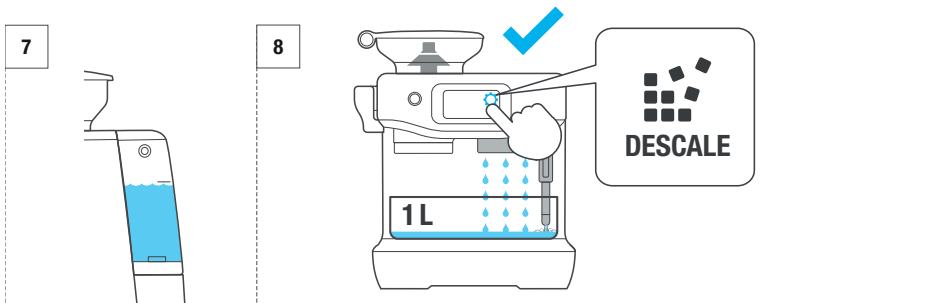

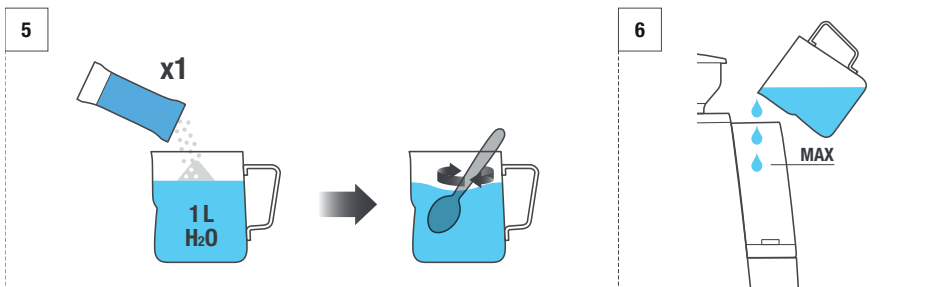

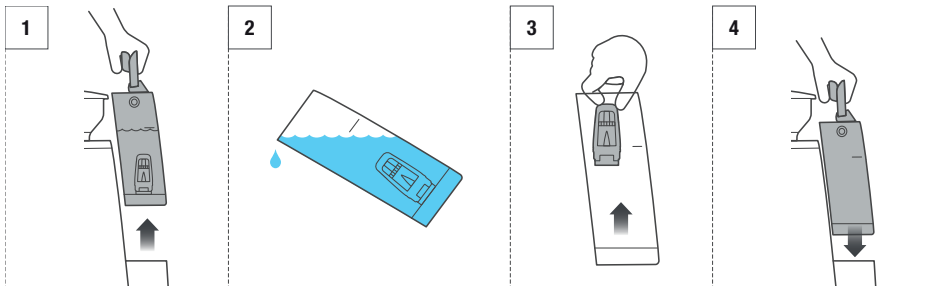

The provided recommendations for standard cleaning products are based on general usage.

Individual results may vary depending on specific conditions and personal preferences.

For optimal performance, Breville recommends using its own certified cleaning products.

Regular descaling is essential due to the potential mineral buildup caused by hard water. This buildup can significantly decrease brewing flow, brewing temperature, machine power, and taste. It is highly recommended to descale the machine every 1-2 months or on a regular basis, regardless of using the provided water filter.
