

BARATZA®

Sette 270

Conical Burr Grinder

The Sette 270 brings barista-quality grinds to the home barista setup. With 270 steps of adjustment, this grinder can be paired with any espresso machine for professional level espresso.

The mouthfeel and flavor clarity of espresso pulled on the Sette out-classes other home espresso grinders. The density of features offered by the Sette makes dialing in espresso simple and hassle-free. Thirty steps of macro-adjustment and a fully stepless microadjustment system gives the user has a near infinite number of grind settings to allow for the best, most precise dial-in on any Baratza grinder. This allows room for even the most attentive taster to explore delicate layers of sweetness, acidity, and body for all types of espresso from classic Italian dark roasts to Nordic light roasts.

The Sette features our radically redesigned gearbox and burrset in which the outer ring burr rotates around a stationary cone burr. This design allows for high-speed grinding – up to 5g per second – as well as minimal retention of coffee in the system. Most burr grinders utilize a small pathway through which ground coffee travels. With the Sette, coffee simply falls from the burrs down into the portafilter.

Features

Grinding Mechanism:

The Sette Series has, at its core, a revolutionary grinding mechanism that produces gamechanging performance. Key aspects of this innovative mechanism include:

1. A straight-through grind chamber results in highly-efficient grinding and minimal residual coffee in the system.
2. Rotation of the outer ring burr (with twice the surface area of the cone burr) along with proprietary tooth geometry, produces grinding throughput that is two to three times that of others in its class.
3. Proprietary gear box (planetary + crown gear) that maximizes efficiency of torque transfer, resulting in lower power consumption and much less heat.
4. Powerful DC motor for maximum starting torque and efficiency, resulting in cooler operation.

Burrs & Brewing Methods:

Manufactured by Etzinger in Liechtenstein, the Sette 270 is built with 40mm conical burrs, well suited for espresso and manual brews requiring a finer grind range (e.g. AeroPress or V60).

Device Holder & Grounds Bin:

A built-in convertible holder, unique to the Sette Series, allows you to grind directly into a portafilter, the supplied grounds bin, or smaller pourover brewing devices, such as the Hario V60 or Kalita Wave. The rubber sleeves on the arms are fully rotational allowing you the option to position them in a way that best suits the container you are grinding into. The arms can accommodate portafilters from 49mm to 58mm and include an integrated hook for stability. The Sette's grounds bin is made from an antistatic plastic, with a molded spout for easy pouring into your preferred brewing device. It has a usable capacity of 120g.

Digital Control Panel:

A user-friendly front mounted control panel has an easy to read backlit LED display. Three programmable buttons allow for grind time preset setting within 0.1 seconds. Simply press the start button and the Sette automatically delivers precise dosing.

Grind Adjustment:

The Sette has a grind range of 31 steps, ranging from espresso to manual brew. The adjustment mechanism is directly connected to the cone burr, resulting in immediate and precise grind adjustment.

Minimal Retention

To maximize freshness, the Sette minimizes the ground coffee left in the grinder with its innovative straight-through grind chamber.

Accessories

Hopper Extender:

An extension that can add 250 g of capacity to the existing 225 g bean hopper.

S2 Burr:

The S2 burr is an alternate cone burr that improves the grind profile for brew methods requiring a medium-coarse grind.

Specifications

Speed to Grind	2.9g/sec (#8E) - 4.0g/sec (#28)
Burrs	40 mm conical burrs
Bean Hopper Capacity	300 g (10.6 oz)
Grounds Bin Capacity	120 g (4.2 oz)
Weight	7lbs (3.2kg)
Dimensions W/H/D (cm)	13 / 41 / 25
Construction Material	ABS Plastic

Available Colors	
Designed & Engineered	Seattle, WA
Manufactured & Assembled	Taiwan
Burr Manufacturing	Etzinger in Liechtenstein
Warranty	1-Year Manufacturer's Warranty
Safety Listing	UL/CSA/CE/EK
Certifications	CB, ETL, cETL
Power Rating	100-120VAC 50/60 Hz, 200W 2.6A 220-240VAC 50/60 Hz, 240W 1.6A class I
